Mecha Swing Nozzle

“PRO-LINE SERIES” is the best compressed air tools to be installed on production lines.

PRO-LINE BLASTER is compact and rotate/swing at high speed even at low pressure. Using them can improve your work efficiency, help reduce operating costs, and save energy!
Low Pressure Type is also available.

MECHA SWING NOZZLE is an innovative product which uses a high-speed oscillating nozzle with a wide arc that helps in dispersing air/liquid to a wider area.
Water Resistant Type/Direct-connect to Water Supply Type is also available.

Application Example

Pro-Line Blaster, Mecha Swing Nozzle

- Draining • Drying • Cooling
- Prevention of contamination (Water/Foreign matter removal)
- Removal of cutting chips in machining
- Install to Automated Line etc.

Water Swing Nozzle

- Washing vegetables
- Spraying of coolant during cutting work
- Cleaning/Odor removal of processing machine (inner wall of processing chamber)

Type	LAB-20-SUS	LAB-28-SUS	LAB-35-SUS
Feature	Pinpoint Rotation	Medium Rotation	Wide Rotation
Dimensions (mm)	W20 D85 H20	W28 D85 H28	W35 D85 H35
Air Pressure	0.4-0.6MPa		
Weight	31 grams	30 grams	35 grams
Operating Temperature	10 to 50 deg. C (50 to 122 deg. F)		
Connection Part	R1/8
