

# Powerful Air Blow Nozzle **Air Blaster**

**SA-300S-32-SUSE**(Nozzle Unit) **SGA-300S-32-SUSE**(with Gun)

## Revolutionary Air Blow Tool

### Effective for various cleaning, fine plastic/metal burr removal

▲with Gun

▲Nozzle Unit

#### Application Example

- Cleaning for Through-hole Circuit Board
- Fine metal burr removal for precision parts
- Cleaning after press processing
- Swarf removal for Plastic and Metal

The Air Blaster is the best suited for fine metal burr removal. It can remove the fine burr easily and effectively. It is **non-contact type**, so it can remove the fine metal burrs, dust and swarf **without damaging the work**.

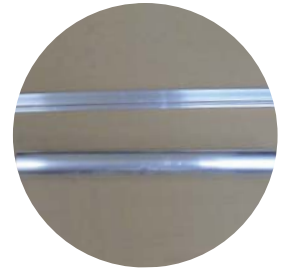

Soldering ball removal

Fine metal burr removal

Fine plastic burr removal

Cutting oil removal

Metal chips removal

You can achieve cost reduction, downsizing, convenience and flexibility.

The work is hardly damaged compared with general high pressure spray or abrasive, and also not get wet compared with ultrasonic cleaning.

Type	SA-300S-32-SUSE (Nozzle Unit)	SGA-300S-32-SUSE (with Gun)
Dimensions (mm)	W28 D142 H28	W28 D240 H170
Air Pressure	0.4 to 0.8 MPa	
Air Flow Rate	200 liters/min (at 0.5 MPa)	
Operating Temperature	10 to 50 deg C (50 to 122 deg F)	
Dry Weight	50 grams	280 grams
Connection Part	R1/8	Male coupler (Cupla) 1/4
